Professional Summary

Full-Stack Software Developer experienced in developing, testing and deploying scalable software products for 10+ active client platforms in production, from backend services and APIs to frontend features. Comfortable working across familiar and new stacks. Proficient in web application development, testing and deployment, and collaborative, fast-paced development environments.

Skills

Backend
Python, Django, REST API, Django Rest

Database
SQLite, PostgreSQL, Redis, Query Optimization

Frontend
HTMX, React, Tailwind CSS, Alpine.js

Tools
Git, GitHub, Postman, VS Code

Cloud
AWS EC2, RDS, S3, Docker, cPanel/Direct Admin

Programming Concepts
OOP, Software Testing (STLC), Version Control/Git Workflows

Work Experience

May 2026 – Present
Pokhara

Junior Software Developer
Selly Nepal Pvt. Ltd.

- Developed and maintained RESTful APIs using Django and Django Rest Framework.
- Built backend features and integrated APIs with frontend components for reliable and scalable end to end operation.
- Designed and managed PostgreSQL database models and queries using Django ORM.
- Customized Django Admin to improve internal workflows.
- Optimized database queries, reducing API response times by 30% across key database endpoints.
- Managed production deployment of Django web applications on cPanel/DirectAdmin, including WSGI configuration, environment variables, and database setup.
- Assisted in frontend development in React.
- Conducted functional, regression, API, and UI testing alongside development to ensure application reliability and production readiness.
- Collaborated with senior developers using Git in an Agile development environment.
- Assisted in client meetings/trainings and helped to make the system handover easier.

Aug 2024 – Nov 2024
Remote

Software Developer Intern
Sandbox Software Pvt. Ltd.
Human Resource Management System(HRMS) Project :

- Researched and integrated open source API in the system for advanced features such as Calendar module with Nepali dates and holidays.
- Gained knowledge about fundamentals of software development and thought process behind a feature.
- Created end to end user flow for HRMS software using Django and also assisted in frontend using React.
- Experienced version control system, particularly Git and agile team environment in a remote setting.

Projects

Ghar Sewa - Smart Home Service Platform

- Developed a Django-based service marketplace with Flutter, PostgreSQL, and REST APIs.
- Created automated test scripts using PyTest and Selenium for user authentication and booking flows.
- Implemented authentication, service booking, user management, and payment integration.

Foodie Express

- Developed a full-stack food ordering application with Django, implementing authentication and order management.
- Deployed the application using Nginx and Gunicorn on AWS EC2.
- For demo gallery, scroll to Projects section inside my portfolio (https://suyesh.com.np/).

Education

2022 – 2026

Bachelor of Software Engineering
Pokhara University
